Summary

Electrical engineer working on the strategic development of Uzbekistan's national power grid. Co-founder of CAMVI, where I build the AI core of a face-recognition and video-analytics product backed by Yoshlar Ventures. I work where energy meets AI, and I like building things from zero.

Experience

National Electric Grid of Uzbekistan Tashkent, UZ Jul 2026 - Present
Specialist, 2nd Category

Department of Strategic Development of Electric Grids. Planning and analysis of national grid development; reviewing and issuing permits for the construction and grid connection of new and existing substations.

CAMVI Tashkent, UZ Apr 2026 - Present
Co-Founder, Head of AI/Backend

Face recognition and video analytics for retail: employee time tracking by face, visitor counting, turnstile-free access control. On-prem, works with RTSP cameras. Built the entire AI pipeline and backend. Two-person team taking the product from zero to market. Raised \$40K from Yoshlar Ventures in July 2026.

Freelance services Tashkent, UZ Feb 2022 - Present
Founder, sole proprietor

Academic help and premium services for students: up to 300+ clients a month. Best month: revenue above 125M UZS with ~75% net margin.

Education

Tashkent University of Information Technologies (TUIT) 2022 - 2026
Bachelor's Degree, Electrical Engineer in Information and Communication Systems

Skills

Power Grid Planning, Computer Vision (Face Recognition, Video Analytics), Speech-to-Text (STT), Python, JavaScript / Node.js, PostgreSQL / MySQL, Docker, Git, HTML / CSS / Tailwind, Figma / UI/UX

Languages

English — Professional working proficiency · Russian — Native · Uzbek — Native · Arabic — Reading

Interests

Strength training, tennis · biohacking (testosterone: 30 nmol/L) · photography and video · space, psychology, books.
